THE CHOICE OF QUALITY, BEAUTY, AND SAFETY COMBINED

With an impressive range of shapes and sizes, Kaixin fiberglass pools are designed to fit every space, whether small or large.

From an intimate garden to a spacious backyard, these designs harmonize seamlessly with the landscape, offering a customized solution that respects and enhances your environment.

By choosing our fiberglass pool, you have the perfect combination of modern aesthetics and exceptional longevity. Between smoothly surface and easy maintenance.

Additionally, their innovations in safety features ensure you enjoy free swimming moments.

DESCRIPTION OF THE STRUCTURE

Mosaic

A kind of decorative material composed of small pieces of material spliced together, usually used for the decoration of walls, floors, etc.

Epoxy layer

A coating with good adhesion, chemical resistance and wear resistance, often used in the fields of anti-corrosion, waterproofing, etc.

Resin fiber layer

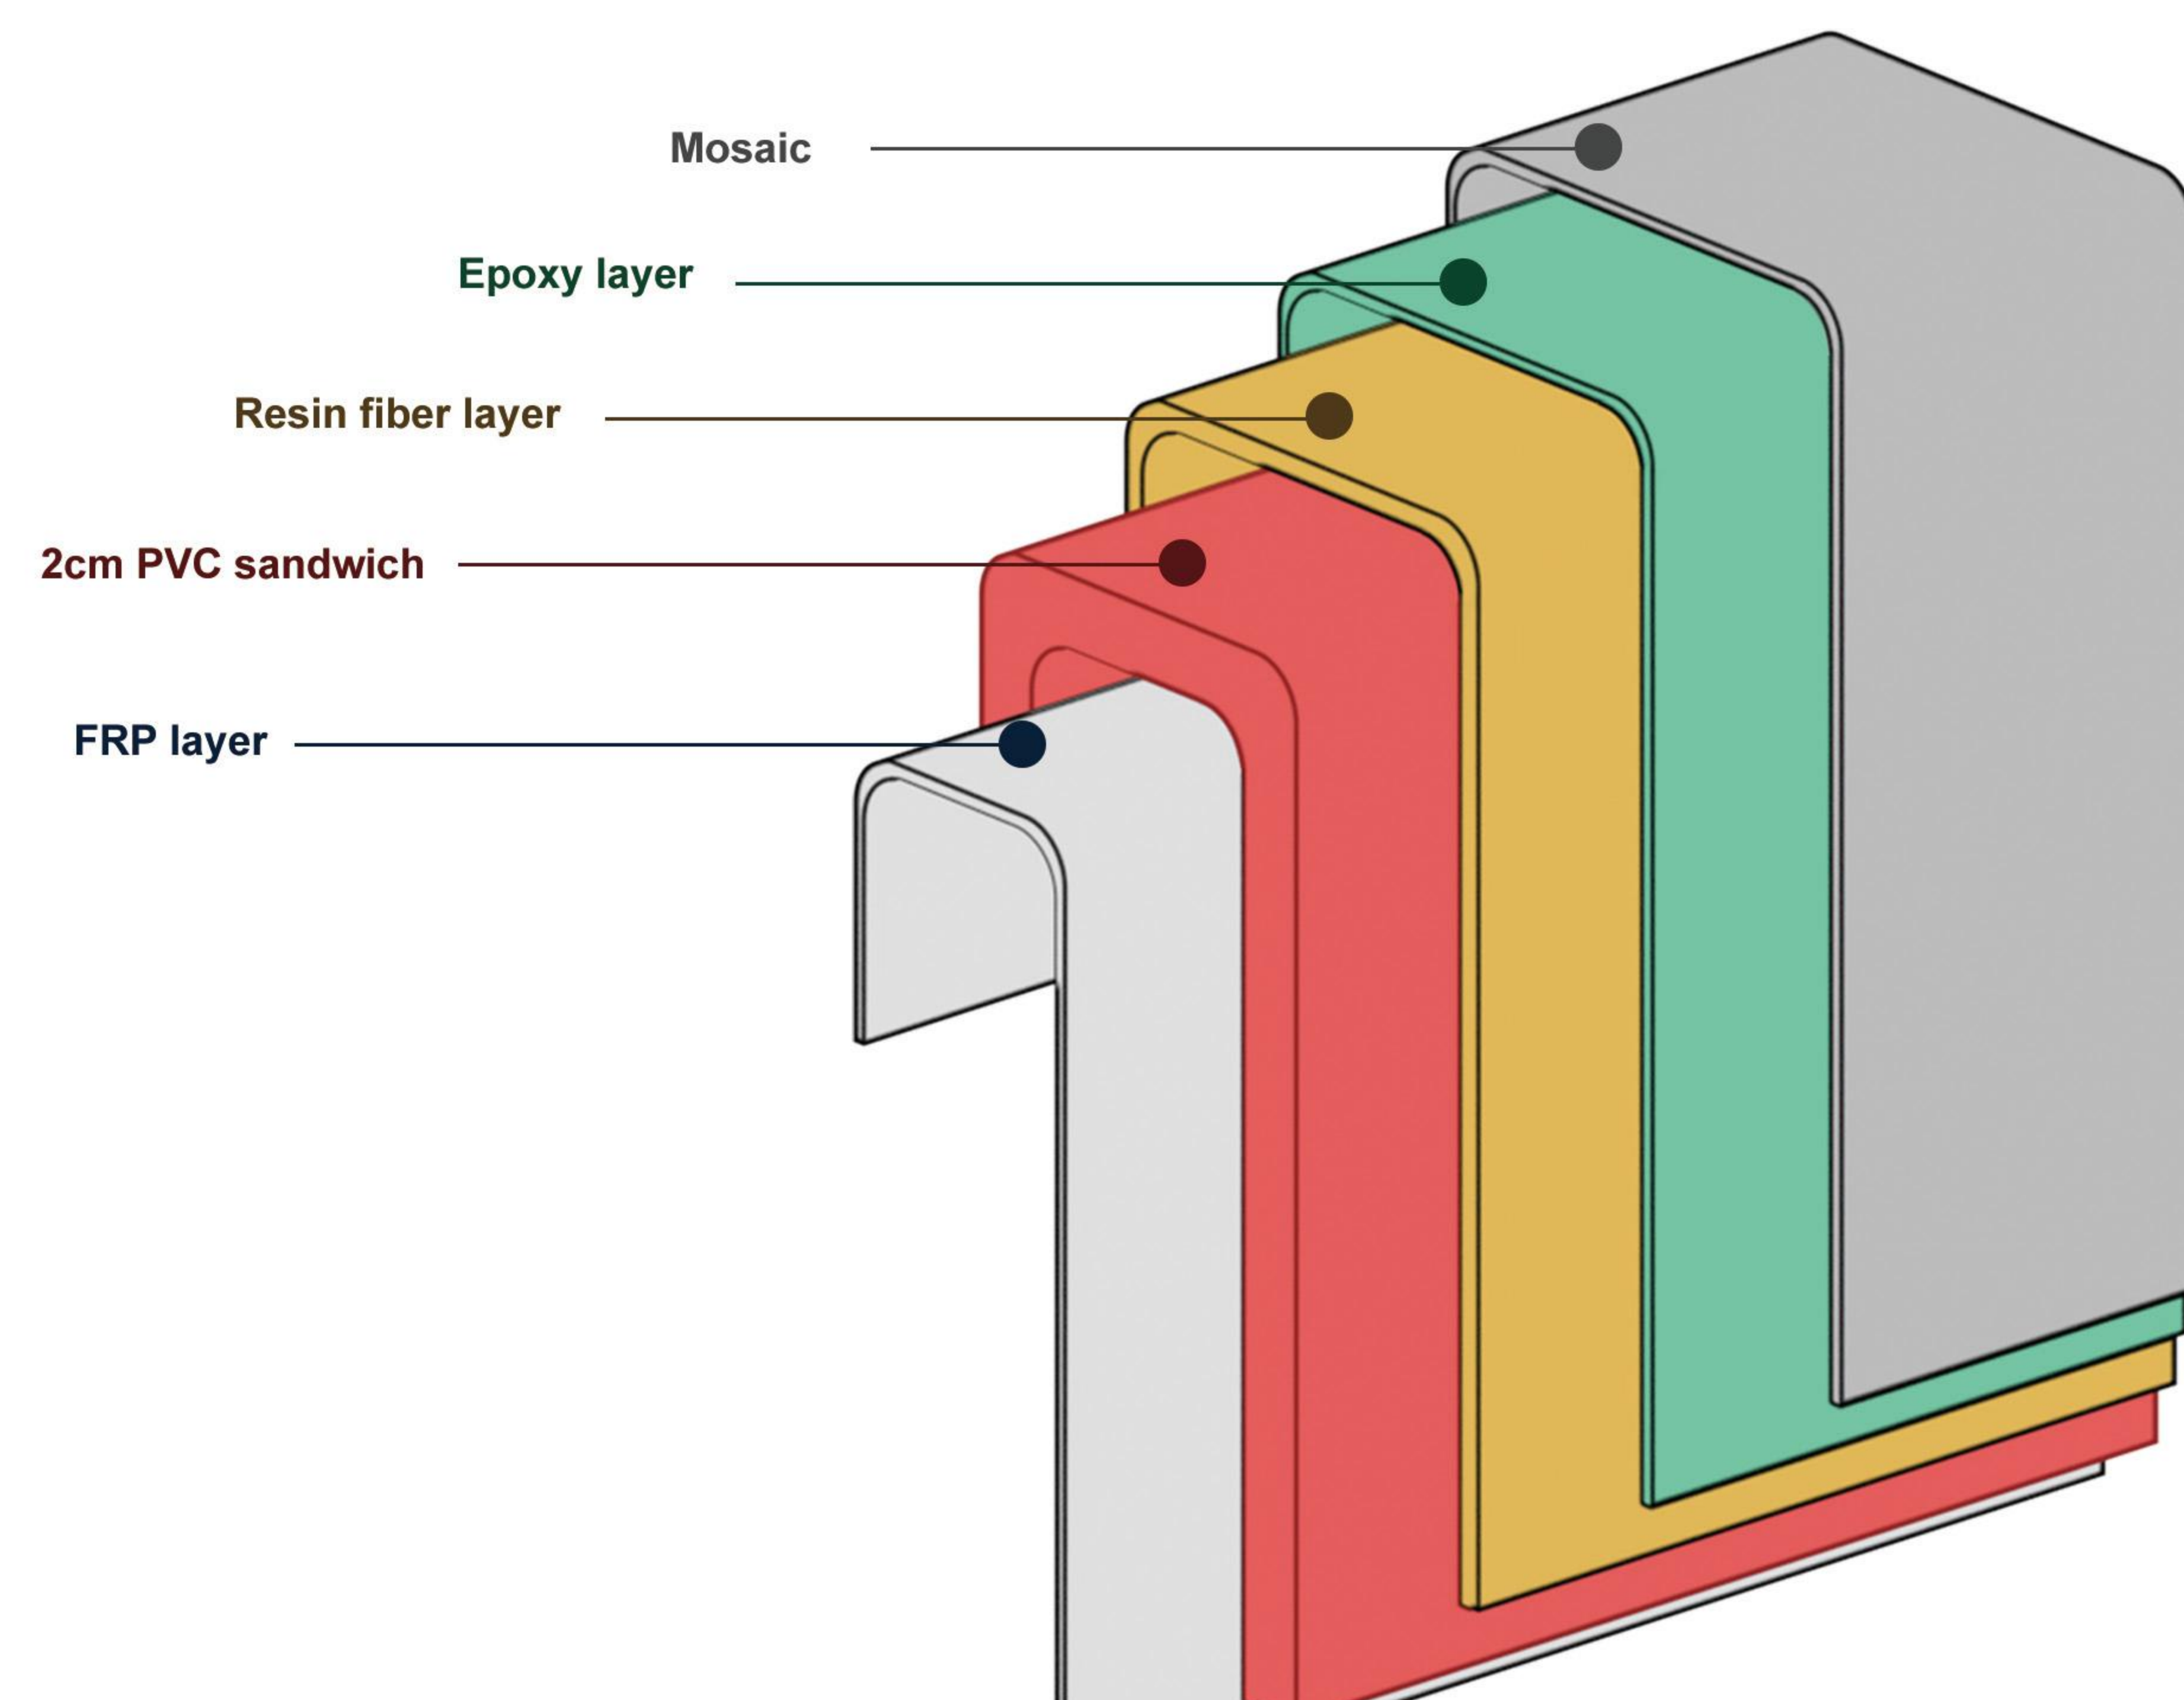

A layer made of resin and fiber materials, with certain strength and toughness.

2cm PVC sandwich

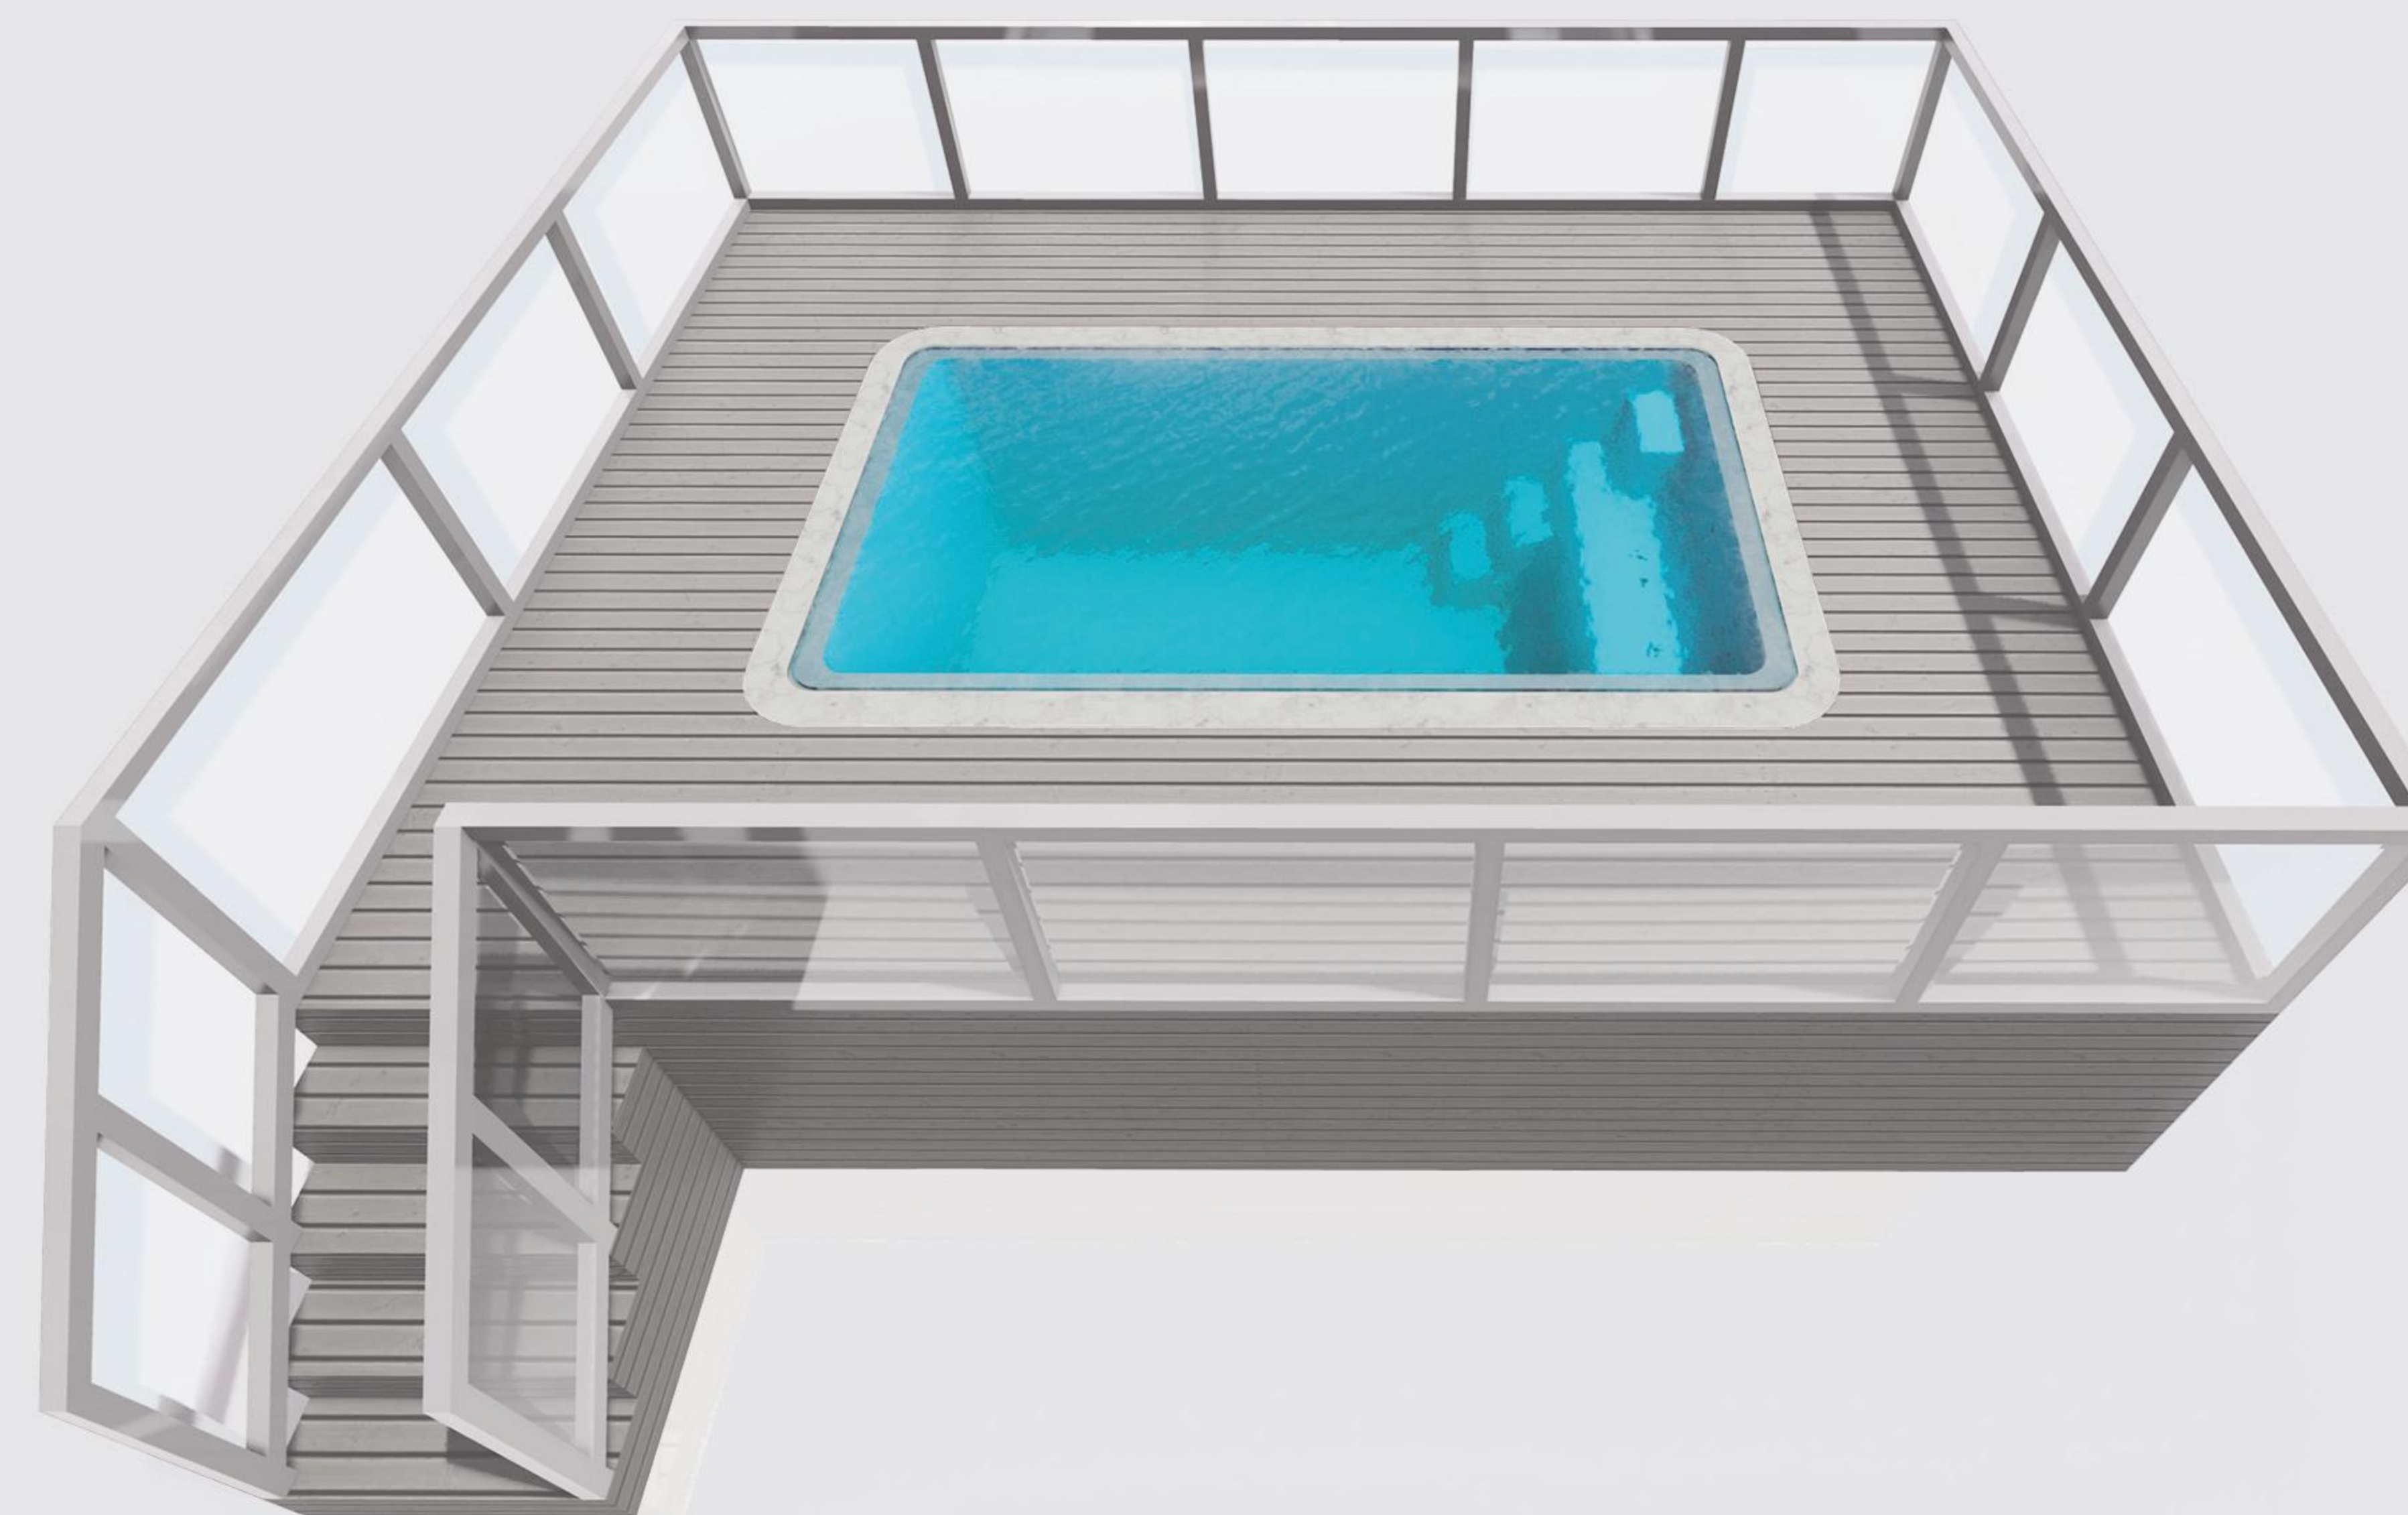

A material with a PVC sandwich material and a thickness of 2cm, with certain insulation, sound insulation and other properties.

FRP layer

A layer made of fiberglass-reinforced plastic, with the characteristics of light weight, high strength, corrosion resistance, etc.

IT CAN BE PLACED ON THE GROUND
OR UNDERGROUND.
